

# Weekly report #1

## Status report

Date	16-02-2014
Week	7
Group	CAPGEMINI_EMR_integration

## Introduction

This is the first status report.

We have spent most of our time on planning, and setting up the different aspects of the project. Brainstorming a lot about requirements and gathering necessary information have been the main focus this week.

## Open / closed problems

Information gathering.

### Solved problems

- Get in contact with Heidi Torstunsen from OUS.
- Get the basic requirements ready.

### Open problems

- Get in contact with DIPS
- How to model the architecture to work with the heavy security requirements.
- Define a structure of the server "packages".

## Planned work for next period

Set up next sprint. Build sprint backlog and reach agreement with the customer about priorities.
