

# Weekly report #7

## Status report

Date	 30 Mar 2014
Week	13
Group	CAPGEMINI_EMR_integration

## Introduction

This week we finished sprint #4.

## Progress summary

Group and work has progressed very well this week. The group agrees that everyone has pitched in and that team moral is back to normal since our setback last week. A great effort was put on from everyone to finish this version of the app in time for our demo.

At the end of the week we had a new demo-meeting with our customer at Capgemini and GE Healthcare. They were pleased with what we've achieved so far. They understand that our task fathoms a lot of research, and that we've had some setbacks as answers appears. With that said they are really looking forward to see how our app is looking the next time we meet.

## Open / closed problems

### Solved problems

- Offline mode.
- Stripping of data in offline mode.
- Introduced sessions.
- QR-scan.
- Fixed a lot of issues regarding application flow.

### Open problems

- Database encryption.
- Talking and transferring of data with the DIPS server.

## Planned work for next period

- Start sprint #5.
- Write sprint retrospects for sprint #4.
- Try to complete remaining issues in sprint #5 since some group members leaves early the week before easter.
