

Weekly report #10

Status report

Date	27-04-14
Week	17
Group	CAPGEMINI_EMR_integration

Introduction

This week we resumed work after Easter break.

Progress summary

The group has not met during the Easter break, so on Tuesday some time was spent in getting everyone up to date as to what group members has worked on. We didn't require members to work during the Easter, so some members used the time to do some much needed re-charging of batteries.

While the deadline is approaching faster and faster, we feel like we're on track. With that said, everyone needs to pull their weight if we're going to finish this on time, and have some much needed time on the report itself.

This week we've been working on sorting out bugs in the app. As well as streamlining the user experience with the word constancy as an important factor. The app itself is slowly, but steady, nearing a release candidate state.

Work is also being done on the back-end service, authentication and uploading of diagnostic data(picture, metadata) is just about a finished future.

Open / closed problems

Solved problems

Key	Summary	T	Created	Updated	Due	Assignee	Reporter	P	Status	Resolution
EA-160	Weekly rapport # 10		Apr 27, 2014	Apr 27, 2014	Apr 27, 2014	Jens Kristian Espevik	Jens Kristian Espevik	↑	RESOLVED	Fixed

Planned work for next period

Next week we plan to finish sprint 6 and have the app finally ready. We're also prepared to do a lot of work on the report early in the week to meet the deadline to qualify for feedback.
